

Team reflection sprint 2

- A. The current situation or "what is" (A),
- B. What you want the situation to be or "what might or should be" (B), and
- C. A plan for getting from where you are to where you want to be or "feedback designed to reduce the gap" (A -> B).

Customer Value and Scope

- A. We don't have a clear understanding of which parts of the products are most important to the customer. This made it hard to define the success criteria
- B. Know where the value in our product comes from, and thereby define how progress is made on the project.
- C. Meeting with stakeholders to discuss ideas and potential directions to take.

Social Contract and Effort

- A. We have defined a social contract but not defined effort estimation to the user stories. We are not currently keeping track of workloads. This SPRINT we worked individually due to the holidays interference.
 - a. The user stories for this sprint have been to fully create the development environment
- B. We want to do effort estimation for each user story before moving it to WIP. We want to collaborate more closely.
- C. Spending more time during the preparation phase of each sprint. Following the social contract. We will work in more close proximity once everyone is back from the easter holidays.
